

L508 Smart Radar Tail Light Product Version Announcement

Recently, it has been noticed that customers in some markets have purchased non-local versions of the product from unauthorized channels. In order to protect the legitimate rights of customers, Magene releases this announcement regarding the International and Chinese versions of Magene L508 smart radar tail light. Customers kindly identify the international version of the product when purchasing to ensure that the product functions are not restricted and to enjoy piece-of-mind after-sales service.

1. The official product version sold by Magene in markets out of China is the International version.
2. The International version product is differently designed from Chinese version. If the corresponding version is not used in your region, Magene does not ensure that product functions and after-sales service are available.

Magene committed to bring better experience to customers through continuous innovation and improvement. Since its launch, the L508 smart radar tail light has been upgraded for two versions. The new version adding many new functions such as personalized light mode and brightness, customization of sleep time, and power saving mode, etc, for which the product has been recognized by more customers.

Therefore, Magene strongly recommends customers to identify and purchase the International version of the product sold by authorized local channels.
